

PRINCIPALS RESUME

MARK DEWALT, AIA, a founding partner of Valerio Dewalt Train Associates, brings a focused energy to his work. Whether overseeing the design of technically demanding laboratory facilities or directing a complex retail redevelopment, he brings the same passion for innovation and willingness to do the hard work necessary to create good design. Mark's broad range of clients includes corporate, laboratory, industrial and retail and facilities.

DAVID JENNERJAHN, AIA has been with the firm since its inception as Valerio Associates in 1988. In 1996, he won the Young Architects Award from AIA Chicago. Dave's innovative work responds to the energy of the urban environment and the spirit of the place. He explores the complex relationship between building and site, site and surroundings, interior space and outdoor rooms. His tireless work ethic has led to the successful completion of complex and demanding urban works around the Midwest.

RANDALL MATTHEIS, AIA explores the material nature of architecture and the promise of program. He has a profound interest in technology, art and culture that informs his work in corporate offices, retail facilities and other project types. A graduate of the University of Wisconsin-Milwaukee and the University of Pennsylvania, Randy has completed projects in cities throughout the US and in Canada.

DAVID RASCHE, AIA brings a strong focus on technology and its impact on design to each project and to the firm's broader practice. An experienced project manager on high profile projects, Dave has worked with clients as diverse as NBC News, McMaster-Carr, Information Resources, Inc. and Underwriters Laboratories on mission-critical facilities throughout the US. Dave is also the firm's technology advocate, and is responsible for maintaining our leadership in technical applications.

LOUIS RAY, AIA has directed numerous national roll-out programs for corporations, manufacturers and retailers, developing design, furniture and network standards. He has worked extensively in the tech sector for some of the best known New Economy companies, where speed to market is a critical factor for most building programs. An agile manager, Louis regularly directs multiple projects with competing deadlines, bringing confidence and energy to each assignment.

JOSEPH M. VALERIO, FAIA, a founding partner of Valerio Dewalt Train Associates, is recognized as a significant voice in contemporary American architecture. A tireless innovator with an enormous capacity for creation, his award winning work has been widely published in international periodicals and was the subject of a monograph published by Rizzoli in 1999. In 2002, Joe was appointed to the National Board of Peer Reviewers under the GSA Design Excellence Program.

SENIOR ASSOCIATES RESUME

BRADLEY PAUSHA, AIA, LEED AP has the energy and organizational skills to manage everything from a simple renovation to complex roll-outs. A tireless worker, Brad focuses on the details that bring projects to fruition, including everything from design to schedule, budget to project closeout. Equally comfortable on corporate, retail or residential projects, Brad has completed work for clients around the country.

HEATHER SALISBURY, AIA, LEED AP is an award winning designer and project manager with national practice experience in corporate facilities. Her interest in the innovative use of materials and diligent attention to detail has resulted in many successful projects. Her clients include developers, national corporations and non-profits for new construction as well as building renovations. Her designs have been recognized by design competitions and professional award programs.

ASSOCIATES RESUME

SHERI ANDREWS, AIA In her thirteen years of professional practice, Sheri has worked on a range of projects for institutional, retail, multifamily housing and healthcare clients. As a project manager at VDTA, Sheri has played a significant role on the Harris Bank roll out program and on the Shedd Aquarium. In recognition of her talents and contribution to the firm's practice, Sheri was made an associate in 2008.

ANTONIO CALIZ, ASSOC. AIA brings 15 years of experience to the Valerio Dewalt Train team, including six years in Mexico and South America. His work on projects around the world makes him a uniquely valuable member of the firm. Since joining VDTA in 2005, Antonio has been assigned to the eBay North Campus project, serving as a designer and project manager. Antonio heads up our California office in Palo Alto.

STEPHEN DROLL, AIA As a Project Manager at VDTA, Steve has proven to be a go-to guy for large and technically complex projects. Whether managing an urban infill development for a private developer or a corporate campus for a major industrial supplier, Steve brings the same interpersonal skills and organizational talent to each project. Steve is also a leader within the firm, involved with developing project management systems and tools, organizing employee team building activities and contributing to the spirit and culture of the firm.

CHRISTINE McGRATH, AIA, is an accomplished designer and project architect with extensive experience in technical and corporate facilities. She has been involved with several of the firm's largest projects - the 3Com Midwest Headquarters in Rolling Meadow, IL, the Block 89 redevelopment project in Madison, WI and the Cabot Microelectronics headquarters in Aurora, IL. Most recently, she has served as Project Manager for the Miglin Staybridge Suites Hotel in Chicago.

KEVIN SNOOK, AIA, has nearly fourteen years of experience as a Project Manager. Prior to joining VDTA in 2004, his work was focused in the educational, healthcare and recreational fields. Since then, he has worked on our large scale projects for developers, including office, hotel and multi-family residential projects. Kevin's strong management and organization skills have proved to be an excellent match for the unique demands of real estate development.

KURT VOLKMAN, AIA, LEED AP Since joining Valerio Dewalt Train Associates in 2000, Kurt Volkman has worked on a broad variety of renovation and base building projects. Previous projects were primarily commercial and higher education. This included work at the Chicago Board of Trade, master planning for foreign and domestic stock exchanges, the design of the University of Illinois at Chicago Athletic Training Facility and other university master plans.

JOHN WILLIAMSON, AIA As a registered Architect in the State of Illinois with thirteen years experience in professional practice, his skill set emphasizes a diverse skill set working on a varied portfolio of building types. Working for equal years in both single family residential as well as commercial residential and institutional projects he understands the importance of bringing well designed and detailed project in on budget. This experience has been essential in bringing the artistic design vision to a reality while providing excellent client service.
