

3COM COMMWORKS DIVISION BUILDING, MOUNT PROSPECT, ILLINOIS

3COM COMMWORKS DIVISION BUILDING, MOUNT PROSPECT, ILLINOIS

This comprehensive phased renovation and expansion was designed to transform an aging 650,000 square foot manufacturing building into a modern, new office, production and research/development facility. The Phase 1 renovation, completed in 1996, established new areas for large scale modern production and new office space. To maximize office space, a new mezzanine level was created overlooking new atrium space and a connecting corridor.
