

3COM RESEARCH CENTER, WEST VALLEY CITY, UTAH

3COM RESEARCH CENTER, WEST VALLEY CITY, UTAH

3Com consolidated their offices and labs for the Salt Lake City region in this new 77,000 sf research center. The building includes workstations for 300 people, 10,000 sf of development and testing laboratories, a 200 seat cafeteria, and an exercise/health center. All employees have open workstations. Enclosed conference rooms are provided for meetings. This democracy of space is reflected in the design through the use of large open areas, light transmitting walls of glass and polycarbonate and the open stair.
