

NORTH POINT COMPETITION, BOSTON, MASSACHUSETTS

NORTH POINT COMPETITION, BOSTON, MASSACHUSETTS

VDT was invited to enter this competition to design buildings as part of a new urbanist scheme to reclaim the MBTA Long-Term Maintenance railyard in East Cambridge. In Stage II, VDT designed a pair of buildings on adjacent blocks containing 300 multi-family units. A grassy platform divides the buildings horizontally. The buildings purposely recall the industrial past of East Cambridge inexactly, becoming something which is both new and familiar.
