JOHN G. SHEDD AQUARIUM MASTERPLAN, CHICAGO, ILLINOIS

Billed as “The World’s Aquarium,” the John G. Shedd Aquarium in Chicago is the largest indoor aquarium in the world. The core facility at the Shedd is the original 1929 building designed by Graham Anderson Probst and White. With significant additions in 1991 and 2001, the Shedd has maintained its forward position with periodic well-executed exhibits and attractions. In 2004, VDTA was selected by the Shedd to develop a five year exhibit and facility master plan that will carry on the Shedd’s tradition of leadership.
