

ZENITH ELECTRONICS CORPORATION ENGINEERING DESIGN CENTER, LINCOLNSHIRE, ILLINOIS

ZENITH ELECTRONICS CORPORATION ENGINEERING DESIGN CENTER,
LINCOLNSHIRE, ILLINOIS

VDTA worked closely with Zenith as they planned the transition in their operations from manufacturing to a core business in the research and development of consumer electronic products. This 50,000 square foot interior was designed to house a staff of one hundred electronic engineers, support staff and senior corporate executives. The facility provides for electronic and wet lab spaces in the building core surrounded by open office areas. All open office areas have natural light from two directions.
