

EBAY CAMPUS, BUILDING 17, SAN JOSE, CALIFORNIA

EBAY CAMPUS, BUILDING 17, SAN JOSE, CALIFORNIA

Building 17 is the first new building developed for eBay at their San Jose North Campus. It is part of the 2,000,000SF Master Plan that will eventually include 11 buildings. Completed in 2008, the five-story 197,000SF building features precast concrete panels in combination with a custom curtain wall system. The design draws on elements from the existing buildings on campus, which were recently renovated, along with original design elements that reflect eBay's brand and identity. The building is designed to achieve a LEED Gold certification.
